everis real estate
real estate package for SAP S/4HANA®

What is it?

This is a pre-configured S/4HANA ERP solution that enables the efficient management of the economic financial and real estate operating needs of socimis, with an automatic connection to banks, the Public Tax Administration and customers.

This product makes use of standard capacities and functionalities, and provide the last generation SAP memory platform, giving customers an added value in certain business processes.

Ultimately and as a differential element, having **everis real estate**, along with a multidisciplinary team with extensive knowledge of real estate and financial business processes, successfully carries out rapid deployment with customers.

What advantages does it have?

everis Real Estate will enable:

Scalable management and operation in a unique language (financial and real estate).

High granularity control and data tracking.

High granularity control and data tracking.

Automatic interconnection with stakeholders (customers, banks, Public Tax Administration).

Exhaustive control of the space, visual and rapid informing of occupation.

Advanced online reporting system (real estate and financial information, cash, KPIs, etc.).

What business processes does it cover?

Management of the life cycle of rental contracts (conditions and particular features, current and future rental flows, grace periods, break-options, mass billing, etc.)

Project management (allocation of costs and budget control at different levels, notice management, costs tracking, assignment of tasks and resources, etc.).

Billing, accounting and management control.

Debt management and risk hedging.

Operational cash (payments, collections and management with banks).

Immediate data system.
