

an NTT DATA Company

everis SAP business unit products & assets

As a SAP Partner and in the sphere of the Partner Packaged Solutions, we offer a set of consulting services and accelerators to help our customers move onto S/4HANA by being able to measure impacts, adopt the advantageous newness and minimise risks and costs.

What is it?

everisTAX is the product proposed by everis to tackle challenges arising in the tax management and disbursement of public organisations. It is a tax and disbursement data system based on the SAP TRM and PSCD platform that serves to support the following processes:

Comprehensive taxpayer management.

Fiscal database management for taxes (periodical and mass or temporary or sporadic taxes).

Generation of debt through liquidations, self-liquidations or registers.

Notification of liquidations and liquidations to the taxpayer.

Integration and automation with external data sources (DGT (General Office of Traffic), land registry, etc.).

Disbursement process management: freezing, suspension, debt apportionment, management of debits, integration with accounting systems, refund of improper income, write-offs and cancellations.

Disbursement in the executive phase, following notification procedures, response management, grouping and calculation of surcharges and interest.

Recaudación en fase ejecutiva, siguiendo los procedimientos de notificación, gestión de respuestas, agrupación y cálculo de recargos e intereses.

Lists, reports and statements for the use of information.

Adaptation to the security requirements established by the LOPD.

What advantages does it have?

everisTAX will enable:

Increase in efficiency through the facilitation of internal processes and those with other organisations.

360° display of the taxpayer and improved display of master and management data.

Capacity for integration with data sources external to the organisation and with the rest of the company's systems.

What business processes does it cover?

Tax and disbursement management.
